**Subject:** Re: Message from Rick Durham, Vice President, Utilities, Inc.

I find it interesting that we have not heard another word from Rick Durham or the Company despite more reported spills. No phone calls warning citizens or explanations/fixes. Is this email below full of wonderful words Utilities Inc's solution to everything.

Is anyone at the Commission listening to us? Per the Advisory Council, there have been 29 spills in 2013, yet the commission gave Utilities Inc a rate hike in excess of what was requested. PLEASE HELP! Get rid of Utilities Inc. **I support the request to close the Wastewater Treatment Plants (WWTPs) in Tega Cay and have sewage shipped to Rock Hill for treatment instead.**

From the Tega Cay Water Service Advisory Council: There have been four more sewage spills in Tega Cay!!! This despite the fact that Utilities, Inc/Tega Cay Water Service (UI/TCWS) had workers/engineers brought in from surrounding states to work on the system after they experienced 25 sewage spills in the months from January to May 2013. The citizens of Tega Cay have now experienced 29 sewage spills this year which do not include the ones that occurred in private homes and are NOT reported to DHEC.
